In addition, this post may contain affiliate links. Each panel installed must have a space of 1/8 inch around it.Two passesI recommend that GoBoard sealant be applied in two different passes.The first attempt should be to concentrate on getting the sealant into the crack. It comes in standard 10.3 oz. caulk tubes and is applied with a caulking gun. Without leaving a gap, your installation is likely to be waterproof. Tools needed to install GoBoard:And of course the GoBoard backer board and GoBoard Sealant.For a list of alternative sealants, go to the bottom of this post.Before you begin:Check your framing you want to make sure that the wall framing meets minimum standards. The owner of the site can earn a commission if you click on an affiliate link and make a purchase.Á Read moreWhat is GoBoard?GoBoard tile backer board is made by Johns Manville and is a waterproof foam board that provides a surface to be tiled over. ItÁqªª-ª”es similar to other foam backer boards in that it has a foam core with a coating attached to it.It is waterproof. Of course, you have to seal the seams and penetrations as you would with any support board. The second step is to apply more sealant on top of the sealant from the first step. So what to do? Well, this is one area where GoBoard is quite attractive: it costs significantly less than other foam backer boards, but is much easier and simpler to install than cement board. But the GoBoard itself is waterproof and receives no additional waterproofing. How to install the GoBoard Tile Backer BoardHow to install the GoBoard Tile Backer BoardWatch this video on YouTube. Why is the GoBoard Tile Backer Board mandatory? Unlike some of the other popular foam boards that require their own brand of special screws and washers, GoBoard is uo uo otnemic ed acalp ed sosufarap moc roofing nails.edit: GoBoard fasteners are now available and can be spaced every 8 inches instead of 6 inches. Don't forget that there is an internal seal in the neck of the pipe and that this will have to be stabbed with a metal wire (often, but not always, included in caulking guns). When complete, check for holes and gaps. Once the GoBoard backing board is installed and the sealant is dry, you are ready to install the sealant. For more information, including technical and safety data, please visit the GoBoardªs website. However, due to the pandemic and the shortage of supply, its production is suspended for the time being. How to install GoBoard Tile Backer Board: Two methodsThe first method is the way that is outlined by other foam backer board manufacturers. Since a standard bathtub is 60 inches wide, I don't think it is a coincidence that the tile backer boards are 60 inches long. Part of the technology they developed for their products went into the creation of GoBoard. In the video above, my wearing long sleeves was not an accident. Not to mention the weight. Of course, there are waterproof foam boards on the market, but they are extraordinarily expensive. If you are unable to purchase this sealant, GoBoard has a list of alternative sealants on their website available for download. Below is a list of sealants that were listed at the time of this issue (early 2020). This includes betweenÁ the Goboard and the tub (or shower) flange and also the vertical corner seams.Á This will allow the sealant between these two points.Á Applying GoBoard faz o seu prªprio selante para os seus painª©is Goboard. Estas incluem:16 polegadas no centro do bloqeoio ao redor da base da banheira ou chuveiroTodas as costuras e bordas verticais suportadas Uma polegada de selante deve ser espalhada em cada lado das costurasInstalando o GoBoard Tile Backer BoardI estava instalando as paredes ao redor de uma cuba de alcofa. Manga comprida vai ajudar a minimizar este inconveniente.2021 atualizaªÁªEo: GoBoard saiu com uma nova prancha de apoio com caracterÁsticas Aªnicas, uma das quais Áª que nªEo tem o problema da comichªAeO. Desde entªÁo, lªªm lanªÁado o sistema de duche GoBoard, bem como muitos outros produtos. O importante Áª garantir que a lacuna seja selada. Limpeza e passos finais Descobri que o selante se limpa com Álcool desnaturado. A Aªnica diferenªÁa Áª que, em vez de usar uma faca de massa plana para alisar, vocªª usaria a ferramenta de canto. Estas duas ferramentas funcionam muito bem para alisar o selanteTub ou a flange do chuveiro. Then apply more sealant on top of that sheet and install another sheet on top of it.The video below demonstrates this method:How to Install Johns Manville GoBoardWatch this video on YouTube.In this post, and my video, IªEªªm going to demonstrate the second method: Install all the GoBoard first- then apply all the sealant afterward.I use these 1/8 inch horseshoe spaces to gap around the GoBoard panels so it can be filled with sealant later.Install First: Seal laterThe advantages of installing GoBoard this way are that youªEªAre not constantly going from the sealant to the install.I like to wear rubber gloves when applying any sealant and I find it preferable to put them on one time and tackle the goopy part all at once.However, the critical aspect of this is to make sure that you leave a 1/8 inch gap everywhere that you will need to apply GoBoard sealant. Tªªbua de suporte do GoBoard Tile Backer instalado em torno de uma cuba de alcova Qual Áª a pegada?
